

# WALL MOUNT WEATHERPROOF STROBE

FS-340R-WP

#### **Features**

- 12 VDC with 15, 35 or 60 cd settings
- 24 VDC with 15, 35, 60, 75, 95 or 110 cd settings
- For outdoor or indoor applications
- 6 distinctive candela settings
- · Candela selection view window
- 15/75 ADA compliant on 60cd setting
- Pre-wire back plate
- Universal back plate mounting
- Single screw mounting
- UL and C-UL listed

# **Description**

The FS-340R-WP Strobe provides a wide range of candela light output options in a single device. The candela settings include a 12 or 24 volt operation for the 15, 35 and 60 (75 on axis) candela settings and 24 volt operation for the 15, 35, 60, 75, 95 and 110 candela settings. The candela setting is displayed through the front window and is selectable using a drum wheel. The voltage input can be either regulated DC or full wave rectified (FWR). The strobes can be synchronized using a control panel with the Mircom (Amseco) sync protocol or an SDM-240 sync module.

The FS-340R-WP utilizes a universal mounting plate. The back plate allows the installer to mount the plate and terminate the wire connections. The strobe attaches in a hinge fashion from the top and is secured by a single mounting screw. The strobe completely covers the mounting back plate, therefore it can be mounted before other trades work is completed and not affect the final look.

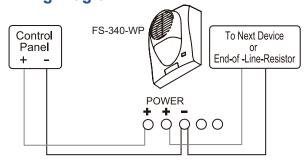

The FS-340R-WP is listed for both outdoor and indoor applications and comes complete with a matching weatherproof back box.

# **Engineering Specifications**

The installer shall provide and install the FS-340R-WP selectable strobe. The strobe shall have six (6) candela settings. The candela settings shall be selectable using a drum roller and shall display the candela setting on the front of the device. The strobe shall operate at 12 or 24 VDC regulated or full wave rectified (FWR) and shall have an operating range between 8 and 33 VDC.

The strobes can be synchronized using a control panel with the Mircom (Amseco) sync protocol or an SDM-240 sync module. The strobe shall utilize a mounting plate that allows the installer to pre-wire the mounting plate. The mounting plate shall be completely covered by the strobe and shall be secured by a single screw. The FS-340R-WP can be mounted outdoor and is listed for such applications. In outdoor installations, the FS-340R-WP shall be mounted on the matching weatherproof backbox. . The operating range shall be 32°F to 120°F (0°C to 49°C) for the indoor installations and -40°F to 151°F (-40°C to 66°C) for the outdoor installations. The strobe shall be UL listed to standard 1638, General Signaling, and standard 1971, Signaling Devices for the Hearing Impaired. In addition, the strobes shall be C-UL listed to CAN-ULC S526.

## **AWARNING**

High voltage may be present inside the light assembly even though power is not connected. If access to the component board is required (removal or replacement), the capacitor must be discharged by touching a wire to both ends of the flash tube.

DO NOT attempt to touch or move the assembly until the capacitor has been discharged.

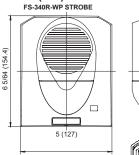

### **Specifications**

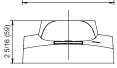

#### **Strobe Current**

	Limbs	Max. RMS	S Operating	Current (mA RMS)	
Setting	Light Output	Reg. 12 VDC	Reg. 12 FWR	Reg. 24 VDC	Reg. 24 FWR
